WHEREAS, the social cost of carbon should be factored into its use; and,

WHEREAS, we must reduce greenhouse gas emissions to near-zero by mid-century to avoid catastrophic climate change; and,

WHEREAS, the simplest, most transparent, efficient, and enforceable method to reduce emissions is to put a fee on carbon at the point of entry into the economy; and,

WHEREAS, the monthly dividend generated will protect the poor and middle class from the increased cost of energy with average households coming out ahead;
